

Is interest in astronomy growing in Ukrainian Wikipedia over the last two complete years, and how robust is that signal?

2024-09-01 — 2026-08-31 · UTC · all-access / user

Compare the latest 12 complete months with the preceding 12. Growth is a research signal, not a launch decision.

Series	Views / 12m	YoY	Share YoY	Peak excl.	Signal
uk	6,708	-59.6%	-46.4%	-57.5%	no clear growth

uk: coverage 100%; positive YoY months 1/12

RESEARCH DECISION: No automatic shortlist

The chosen proxies do not meet the growth criteria. Test broader topic coverage and learning intent before deciding against the product.

LIMITS: Attention ≠ paying demand; language ≠ country. Current titles omit redirect traffic and may miss historical moves. Seasonality, news and imperfect bot filtering remain. Heuristic signals are not confidence intervals.

uk: [Астрономія \(Q333\)](#)

SOURCE: [Wikimedia Analytics API](#). Retrieved: 2026-09-23 — 2026-09-23. Exact URLs and hashes: provenance.json. Share the report folder for the full audit trail. Peak excl. removes the highest latest-year month and its prior-year match.
